

OBJECT OF THE GAME: Be the first to get your engine into the shed!

GETTING READY TO PLAY: Choose an engine and place it at the start.

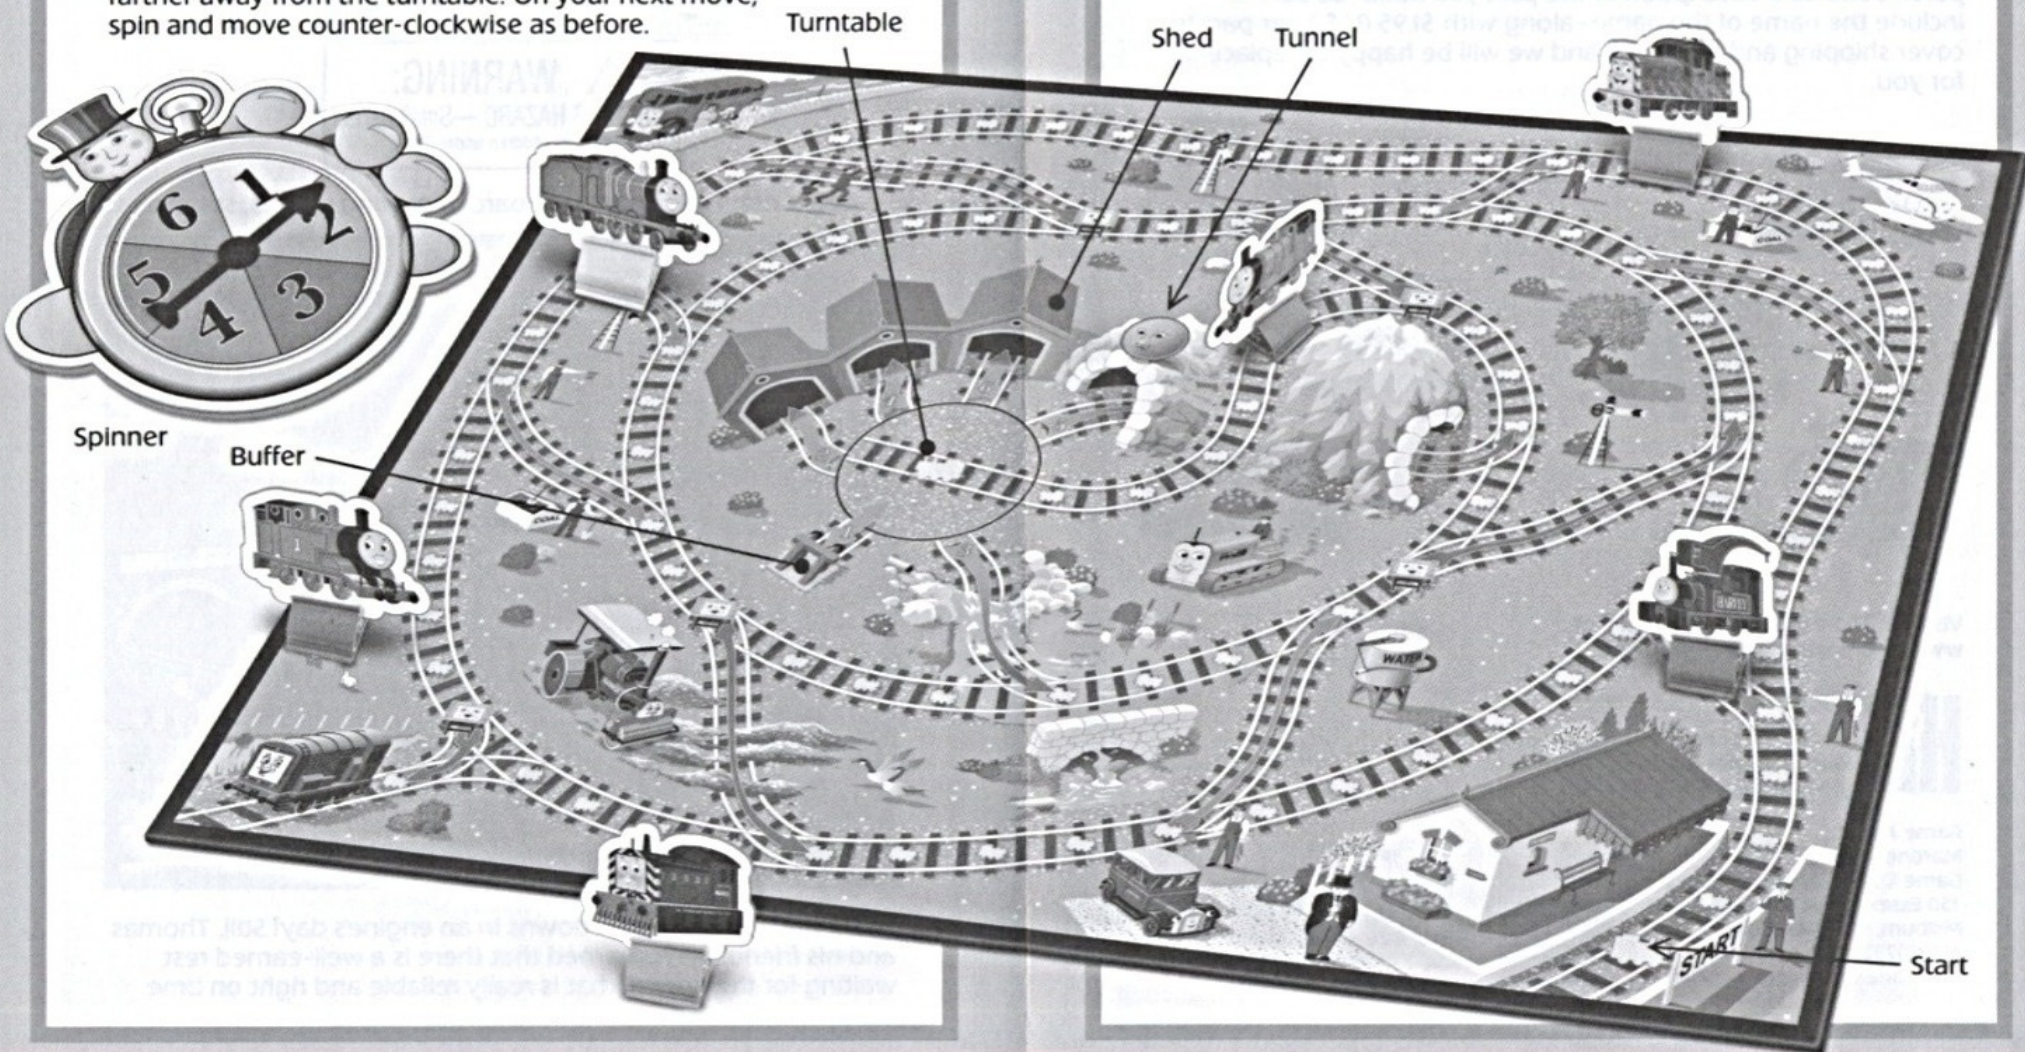

PLAYING THE GAME: Spin the spinner and move your engine as many spaces forward, always moving counter-clockwise and landing on either an engine icon, a green arrow, or a Troublesome Truck.

- If you land on a green arrow, immediately move your engine to the other end of the arrow and stop on the yellow engine icon. Terrific! You have moved closer to the turntable.
- If you land on a Troublesome Truck, follow the red arrow to the next yellow engine icon. Too bad! You have moved farther away from the turntable. On your next move, spin and move counter-clockwise as before.

THE TURNTABLE: Before you can enter the shed you must first land on the turntable. For example, if you are one space away from the turntable and get any number on the spinner, place your engine on the turntable. On your next turn, if you spin a 2, 4 or 6, you enter the shed and win!

- If you spin a 1, move your engine on to the buffer and wait until your next turn to try again.
- If you spin a 3, oh no! Your engine slides down the washed out track.
- If you spin a 5, oh no! Quickly move your engine to the other end of the tunnel before Boulder falls down on you!

WINNING THE GAME: The first engine to reach the shed is the winner!
